

Line#	Considering Dylan's C code – things to think about
36	file pattern: Should we specify “.txt”
64-79	Do we need to Calloc all those variables(names, numbers, etc) or can we just keep them static? (ie. num[BUFF_SIZE])
476	getInput function <ul style="list-style-type: none"> <li>- Use of bitwise “&amp;”... why?</li> <li>- If string lengths are equal append ‘\0’</li> </ul>
296	Why memset p?
	Make sure your cryptography does not insert newlines into the crypted password. If it does it could screw up your file read (ie. password and seed differentiation)
373	If num1 * num2 becomes too large does it screw up the output?
	KEY_SIZE in .h not used
